

Cloud Consulting - Our Approach

Today's cloud platforms promise to speed your time to market while enhancing innovation and lowering IT complexity and costs. The cloud is changing the way organizations make business, collaborate and share data. It's forcing companies to adapt and evolve to survive.

The cloud challenges organizations on multiple fronts, across people, process, and technology. You need to bridge enterprise infrastructure and application architectures, all while maintaining data security and compliance.

We are here to help you

As a Cloud Consulting firm, GOBI Technologies fills the gaps and paves the way for a seamless transition to the cloud. Our expertise turns your challenges into a competitive advantage.

Cloud Adoption Framework

Our comprehensive cloud adoption framework delivers services across the cloud migration life-cycle, from conception through production. Our cloud transformation framework encompasses discovery, assessment, and design, through implementation, deployment, and monitoring.

DISCOVER AND ASSESS

Technical assessment and discovery of your existing platforms, infrastructure, and business work-flow enable us to define the path and platforms that support your end goal.

Migrate and Operate

Pilot migration for validation and testing followed by full-scale migration of target applications and infrastructure based on recommended migration strategy and business function.

1

KNOWLEDGE

A crucial stage towards your business cloud journey. Regardless of your goals, a knowledge stage empowers us with knowledge about your business so we can help align your goals with available platforms and strategies.
